FOR IMMEDIATE RELEASE

## **DE SANGOSSE announces the opening of DE SANGOSSE Hellas, its new Greece- based subsidiary, to support the future of agriculture**

**DE SANGOSSE**, a leader in the field of agricultural Biosolutions, **announces the creation of its new subsidiary based in Athens**. This strategic establishment marks an important milestone in our international development and demonstrates our commitment to supporting agriculture through innovative and sustainable solutions.

**The primary objective of our Greek subsidiary will be to support our clients in adopting and developing Biosolutions that perfectly address the needs of Greece’s main agricultural productions.** Greece is renowned for its diverse agricultural base and iconic products such as olives, citrus, grapes, as well as for a variety of other crops like cotton, kiwis, watermelons, strawberries and tomatoes.

In line with our mission to innovate in plant nutrition and protection, **this initiative reflects our ambition to accelerate the agro-ecological transition** through high performing technical solutions.

*“The creation of our subsidiary in Greece underscores our commitment to closely supporting our clients’ needs and to actively contributing to the sustainable development of the Greek agriculture,”* said Nicolas Fillon, CEO of the DE SANGOSSE Group. *“By providing our innovative technologies and collaborating with local distributor dealers and farmers alike, we will address current and future agricultural challenges together.”*

**DE SANGOSSE Hellas will be led by Christos Spiliopoulos.** An agronomic engineer with a Ph.D., Christos has spent three decades working in the international market for biostimulants and biofertilizers. Christos said *“I am delighted to join the DE SANGOSSE Group, whose unwavering commitment to biosolutions I deeply admire. We will quickly build a team of professionals dedicated to strengthening partnerships with local stakeholders, developing training programs on the use of our products, and actively supporting initiatives aimed at sustainable agriculture,”*

**About DE SANGOSSE**

*DE SANGOSSE (Agen, France) is an international leader in agricultural technology. With a proven track record in this field, the Group has successfully operated in the fields of crop protection and nutrition biosolutions, as well as pest management, for many years. The mission of DE SANGOSSE is to support the profound transformation of agricultural systems by providing biofertilizers, biostimulants, biocontrol products, adjuvants, and decision-support tools to all types of agriculture. The synergy of its technologies ensures crops are nourished, stimulated, and protected, delivering a triple performance: social, ecological, and economic.*

*The company's vision aligns with a positive, modern, and sustainable agriculture that addresses food challenges, climate risks, societal expectations, and evolving international regulations. The Group has 1,350 employees, 44 international operating companies, 28 production units, and sales in more than 60 countries. The DE SANGOSSE employees primarily own the company's capital, which ensures its independence and a long-term vision for the company's future.*
